shortlist

Brand guidelines for the CVs that matter.

Shortlist helps recruitment agencies sort and filter CVs against predefined criteria using LLMs. The identity borrows from the recruiter's desk: warm paper, sharp ink and a highlighter mark on the best candidates.

The themes are deliberately distinct: light leads with Forest green and uses Highlighter lime for matches; dark flips this — Lime becomes the primary action, Mint marks matches. Clay / Ember is reserved for warnings and attention, never for primary actions.
